In the spotlight: popular on demand sessions.

[SEE ALL](#)

With hundreds of sessions available to watch on demand, it can be difficult to choose what to check out next. Here are a few to get you started.

Security Entry Points and Active Directory to Prevent Ransomware Attacks

Learn how to find and fix existing security issues within Active Directory (AD), maintain a hardened security level within AD to constantly reduce the attack surface, detect advanced attacks, and more.

[WATCH NOW](#)

Bringing Zero Trust to Industrial Control Systems

This session will look at Zero Trust concepts, ICS vulnerabilities, and how to bring them together to improve trustworthiness.

[WATCH NOW](#)

Generative Email Attacks and How to Defend Against Them

This session will answer: what can attackers do with modern language models and what can security teams do to prepare for the next wave of generative social and email attacks?
